1: Approximate number of active payment solutions customers
2: Approximate number of merchant countries

Unique suite of solutions and integrated product offering.

Our vision

To give every road transportation company - however small - access to the benefits of digitization at scale. We are building a seamless integrated digital ecosystem with the potential to revolutionise the middle mile.

This benefits the planet, as well as Eurowag and our customers, and everyone wins. We are driving the energy transition, with over 300,000 charging points installed across Europe and the introduction of lower-carbon alternative fuels like LNG.
